

CITEM supports the environment by recognizing Philippine companies that uses eco-sustainable materials and eco-friendly products through the “Katha Awards”.

In Manila FAME April 2019, the “EcoDesign Award” was given to Nature’s Legacy’s “Sunburst” wall decal which was made from a proprietary material called Nucast, a recycled paper composite that is lightweight, organic and contains no volcanic organic compound, making its parts safe to consume. The invention can mimic the look and feel of natural finite materials such as stone and metal but does not degrade as easily. Nucast has also been archived in the Material Connexion Library in New York for being one of the “world’s most innovative and eco-sustainable materials. The Sunburst wall was conceptualized by Studio Legacy, the design arm of Nature’s Legacy.

In Manila FAME October 2019, the award was conferred to MASAECO’s “Pebble Bowls” for turning trash into a useful material.

**SPECIAL CITATION:
ECO-DESIGN AWARD**

Product Name: Sunburst

These pebble bowls by Masaeco received a special citation for Eco Design from Katha. [#manilafame70](#) [#manilafame](#) [#heritagereimagined](#)
